

RAINFOREST TRUST

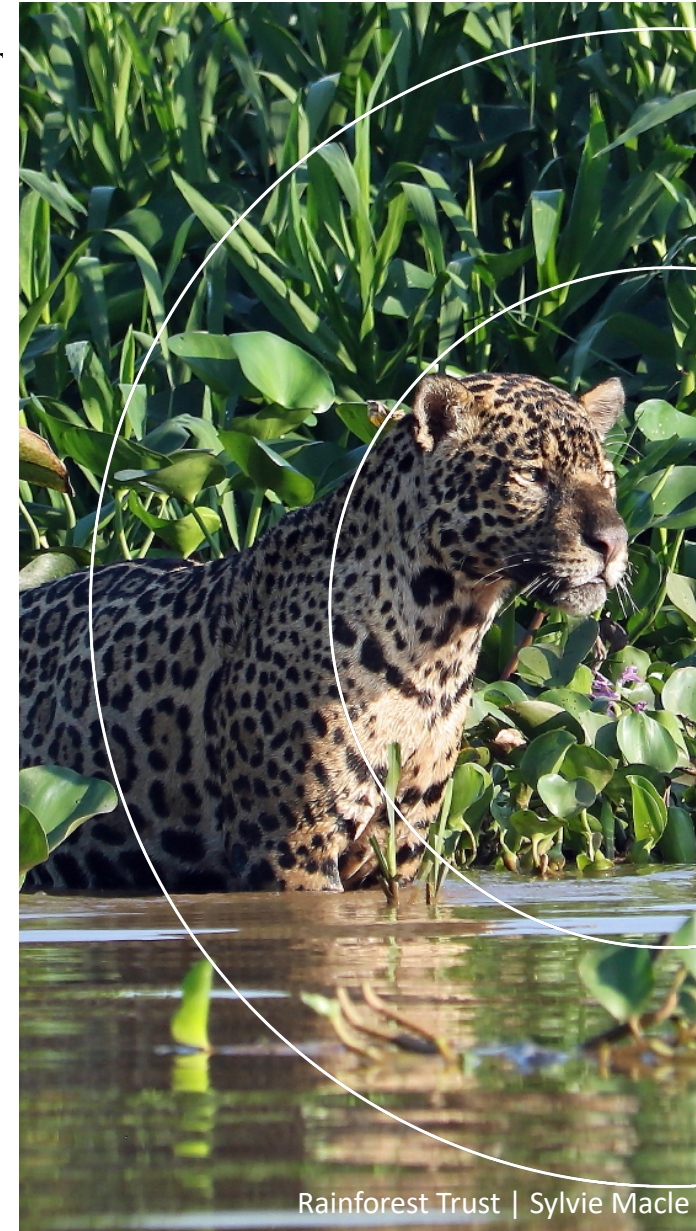

RAINFOREST
TRUST®

- This established charity fulfils the ‘protection’ aspect of the programme – **working to protect threatened rainforest from deforestation and keep carbon safely stored in the forest.**
- Rainforest Trust’s mission is to place the most threatened tropical forests under permanent protection, saving endangered wildlife through local partnerships and community engagement. Through these partnerships, they ensure sustainable results necessary for the long-term protection of tropical ecosystems and the wildlife they hold. They have been implementing their conservation model successfully for over 30 years and have protected over 24 million acres of threatened habitat.

BB

ecolibrum’s donations have helped us to protect over 12,000 acres of forest across the tropics, for the benefit of endangered species, indigenous communities and the planet. These forests safely lock in thousands of tonnes of carbon, helping to combat climate change by preventing dangerous greenhouse gas emissions.
